# OPUS Projects Manager Training

## Step 4 : Network Adjustment

ngs.opus.projects@noaa.gov

2013-08-07 Step 4 : Network Adjustment 1

NOAA's **National Geodetic Survey** Positioning America for the Future www.ngs.noaa.gov

# I've advanced to the second slide and I'm reading it.

- Can you read this slide and hear me as I read it?
- Can you access the web?
- Is everyone comfortable?
- Does anyone have any questions before we begin?

2013-05-16 Introduction 2

NOAA's **National Geodetic Survey** Positioning America for the Future [www.ngs.noaa.gov](http://www.ngs.noaa.gov)

# Outline

- Introduction
- Step 1 : Creating a Project
- Step 2 : Uploading Data
- Step 3 : Session Processing
- **Step 4 : Network Adjustment**

2013-08-07 Step 4 : Network Adjustment 3

NOAA's **National Geodetic Survey** Positioning America for the Future [www.ngs.noaa.gov](http://www.ngs.noaa.gov)

## A few words before beginning.

OPUS Projects is a web-based utility implying that access to the internet and use of a web browser are required. JavaScript must be enabled in your browser and pop-up blocking may have to be turned off. If you have difficulty configuring your browser, contact your instructor or the OPUS Projects team.

2013-08-07 Step 4 : Network Adjustment 4

NOAA's **National Geodetic Survey** Positioning America for the Future [www.ngs.noaa.gov](http://www.ngs.noaa.gov)

## The OPUS Projects look and feel.

The overall layout and appearance of OPUS Projects will be very similar to that shown here regardless of the browser you use. For this reason, the browser window's frame is not shown in the figures.

2013-08-07 Step 4 : Network Adjustment 5

NOAA's **National Geodetic Survey** Positioning America for the Future [www.ngs.noaa.gov](http://www.ngs.noaa.gov)

## What's in this training?

This presentation begins after all session processing has been completed and describes how to perform a network adjustment. The format is as a series of steps like a cookbook. Like most cookbooks, the justification for and discussion of variations in those steps will be minimal. The intent is to get you started quickly, then leave you free to explore OPUS Projects on your own.

2013-08-07 Step 4 : Network Adjustment 6

About OPUS

OPUS Projects

Published Solutions

<- back

OPUS Projects gives users web-based access to simple management and processing tools for projects involving multiple sites and multiple occupations. The advantages of OPUS Projects are:

- Data uploading through OPUS.
- Customizable data processing via the PAGES software suite.
- Visualization and management aids.

---

Create a new project.

**RESTRICTED** to trained project managers. If you have completed OPUS Projects training, you are registered and may create a new project. All others, see the **Training Schedule**.

---

Configure, edit, and process individual network sessions.

**Project Identifier:**

**Session Keyword:**

**Your Email:**

---

Manage, edit, process, and publish the project.

**Project Identifier:**

**Manager Keyword:**

The project ID and manager keyword are required to access the manager's page from the OPUS Projects gateway page:  
<http://geodesy.noaa.gov/OPUS-Projects/>.

Scanning Project

---

Your project is being scanned and web page prepared.

This is a normal operation, but may take a few moments to several minutes depending upon the size of the project and the number of changes.

Website Owner: National Geodetic Survey / \$Revision: 51114 \$Created: 2010-12-13

**Project Identifier:**

**Session Keyword:**

**Your Email:**

---

Manage, edit, process, and publish the project.

**Project Identifier:**

**Manager Keyword:**

The project is always scanned for changes when accessed so the information will be up-to-date.

Results From ALL SESSION SOLUTIONS

The button will email a list of all your projects to you.

2013-08-07 44

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

The screenshot shows the software interface with a map of Louisiana. A blue callout box at the bottom of the map area contains the text: "The next two buttons are disabled placeholders for pending enhancements." Below the map is a table titled "Sessions & Solutions" with columns for session IDs (2137, 2139) and various status icons.

2013-08-07 Step 4 : Network Adjustment 45

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

The screenshot shows the same software interface as above, but with a dialog box titled "Manage Solutions for 'my project @ 2006-10-01'" open. The dialog box contains instructions for solution identifiers and a table for editing session solutions.

**Manage Solutions for "my project @ 2006-10-01"**

Apply Changes and Close

A SOLUTION identifier *must*:  
 • be unique within this project.  
 • be 1 to 30 characters in length.

A SOLUTION identifier *must not*:  
 • contain a forward- or backward-slash, e.g. "/" or "\".

A SOLUTION identifier *should*:  
 • be as simple and brief as possible.

2013-08-07 Step 4 : Network Adjustment 52

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

The table at the bottom of the page is a terse summary of the project sessions, solutions and marks.

MARKS	Sessions & Solutions						MARKS
	2006-274 A	2006-275 A	2006-275 B	2006-276 A	2006-276 B	2006-277 A	
2123			●	●	●	●	2123
2126	●	●	●	●			2126
2137	●		●	●			2137
2139			●	●	●	●	2139

2013-08-07 Step 4 : Network Adjustment 53

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

The column headers across the top of the table name all the sessions, session solutions and network adjustments (no network adjustments exist yet). Session solutions and network adjustments show a baseline indicator below; sessions that haven't been processed do not. Session and session solution headers are convenience links to take you to that session's page.

MARKS	Sessions & Solutions						MARKS
	2006-274 A	2006-275 A	2006-275 B	2006-276 A	2006-276 B	2006-277 A	
2123	○	○	○	○	○	○	2123
2126	○	○	○	○			2126
2137	○		○	○			2137
2139			○	○	○	○	2139

2013-08-07 Step 4 : Network Adjustment 54

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

The row headers list all the project's marks and are convenience links to take you to that mark's page.

MARKS	Sessions & Solutions						MARKS
	2006-274 A	2006-275 A	2006-275 B	2006-276 A	2006-276 B	2006-277 A	
2123			○	○	○	○	2123
2126	○	○	○	○			2126
2137	○		○	○			2137
2139			○	○	○	○	2139

2013-08-07 Step 4 : Network Adjustment 55

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

A mark's inclusion in a session or solution is indicated by the icons in the table. The specific icon used depends upon its solution results.

MARKS	Sessions & Solutions						MARKS
	2006-274 A	2006-275 A	2006-275 B	2006-276 A	2006-276 B	2006-277 A	
2123			●	●	●	●	2123
2126	●	●	●	●			2126
2137	●		●	●			2137
2139			●	●	●	●	2139

2013-08-07 Step 4 : Network Adjustment 56

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

Let's use this table to investigate the possible problem with 2139 in session 2006-277-A. First, let's go to the 2006-277-A page.

MARKS	Sessions & Solutions						MARKS
	2006-274 A	2006-275 A	2006-276 B	2006-276 A	2006-276 B	2006-277	
2123			●	●	●	●	2123
2126	●	●	●	●			2126
2137							2137
2139			●	●	●	●	2139

2013-08-07 Step 4 : Network Adjustment 57

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

In a few moments, longer for larger projects, the 2006-277-A session page replaces the manager's page.

MARKS	ANTENNA	HEIGHT (m)	EPH TYPE	OBS (%)	FIXED (%)	RMS (m)	LAT (m)	LON (m)	HGT (m)
2123	TRM55971.00	NONE	2.000	precise	95.5	84.6	±0.009	±0.004	±0.002
2139	TRM55971.00	NONE	2.000	precise	79.8	100.0	±0.021	±0.004	±0.002
PREFERENCES:				Best Available	≥80.0	≥80.0	±0.025	±0.030	±0.030

2013-08-07 Step 4 : Network Adjustment 58

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

We can quickly see that the percentage of observations included in this session solution from the 2139 data file is slightly below our preferred threshold. The other solution quality control values are acceptable (although the post-fit residual RMS is near its maximum based upon our preferences).

MARKS	ANTENNA	HEIGHT (m)	EPH TYPE	OBS (%)	FIXED (%)	RMS (m)	LAT (m)	LOX (m)	HGT (m)
2123	TRM55971.00	NONE	2.000 precise	95.5	84.6	0.009	0.004	0.002	0.004
2139	TRM55971.00	NONE	2.000 precise	79.8	100.0	0.021	0.004	0.002	0.004
PREFERENCES:				Best Available	≥80.0	≥80.0	≤0.025	≤0.030	≤0.060

2013-08-07
Step 4 : Network Adjustment
59

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

Let's continue this investigation by going to 2139's page. Remember that we can do that by clicking on the row header.

MARKS	ANTENNA	HEIGHT (m)	EPH TYPE	OBS (%)	FIXED (%)	RMS (m)	LAT (m)	LOX (m)	HGT (m)
2123	TRM55971.00	NONE	2.000 precise	95.5	84.6	0.009	0.004	0.002	0.004
2139	TRM55971.00	NONE	2.000 precise	79.8	100.0	0.021	0.004	0.002	0.004
PREFERENCES:				Best Available	≥80.0	≥80.0	≤0.025	≤0.030	≤0.060

2013-08-07
Step 4 : Network Adjustment

62

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

At the top of the page is a Google Map Services™ interactive map showing this mark and its immediate vicinity. Similar to but more capable than the other maps; classes of icons can be turned on/off and clicking on a published mark's icon displays its datasheet. The mark's name in the legend at the top of the map is a pull-down menu to navigate to other mark web pages.

2013-08-07 MARK 2139 Occupations Step 4 : Network Adjustment Manage Data Files Save Occupations 63

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

To the left of the map are general controls for this page. The six to the top should be familiar by this time, but the rest are specific to this web page.

Before beginning a network adjustment, the session processing results for all marks should be examined. We'll leave that as another exercise.

There are many similarities between the network adjustment and session processing controls. As we did then, let's focus on these controls but keep a small copy of the map.

2013-08-07 Step 4 : Network Adjustment 83

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

Perform Adjustment

Adjustment Name (30 char max): final

Included Solutions Available Solutions

[add] 2006-274-A

Processing Preferences

Output Ref Frame: LET OPUS CHOOSE  
 Output Geoid Model: LET OPUS CHOOSE  
 Constraint Weights:  LOOSE  NORMAL  TIGHT

First, note that no marks are listed and all the baselines have been removed from the map. They will be replaced as session solutions are included in the adjustment.

2013-08-07 Step 4 : Network Adjustment 84

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

An adjustment can have a name. Usually, it will be something like “final”, but other names can help organize testing.

2013-08-07
Step 4 : Network Adjustment
85

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

All completed session solutions are listed. At least one must be included. Only one solution from a session should be included if alternates exist.

2013-08-07
Step 4 : Network Adjustment
86

NOAA's National Geodetic Survey Positioning America for the Future www.ngs.noaa.gov

MARK	CONSTRAINT	HEIGHT (m)	LATITUDE (° '' ''')	LONGITUDE (° '' ''')	REF. FRAME
2126	NONE	EL HGT	14.019	W089:48:34.33127	IGS08 (2006.7507)
2137	NONE	EL HGT	33.196	W090:30:25.29761	IGS08 (2006.7506)

CORS	CONSTRAINT	HEIGHT (m)	LATITUDE (° '' ''')	LONGITUDE (° '' ''')	REF. FRAME

### OPUS Projects Processing Queue Confirmation

The network adjustment "final" was queued at 2013-05-21T13:10:34 UTC. When the processing is completed, a solution summary and other reports will be emailed to mark.schenewerk@noaa.gov.

There are 0 processing requests in queue before yours. The estimated time to processing completion is 1 minute. Please be aware that this message was created when the request was queued and the time to completion will not be updated by refreshing this page.

6 solutions were selected containing 8 marks in total. Of these marks, 4 marks were unconstrained and 4 marks were constrained.

Source Solutions: 2006-274-A, 2006-275-A, 2006-275-B, 2006-276-A, 2006-276-B, 2006-277-A

Unconstrained marks  
2126, 2137, 2123, 2139

Constrained marks

covg 3-D	N30:28:33.28953 W090:05:43.94752	-5.932 m EL HGT IGS08 (2005.0000)

Dialog Box Text:

A request to delete the project "my project @ 2006-10-01" has been initiated. For data-safety, the following steps will need to be completed:

- (1) You will need to confirm this action here.
- (2) The OPUS-Projects team will follow-up by sending an email to the project manager requesting a second confirmation. This email will include an option to request a copy of the project on DVD.
- (3) Only if steps (1) and (2) confirm this action will the project be deleted.

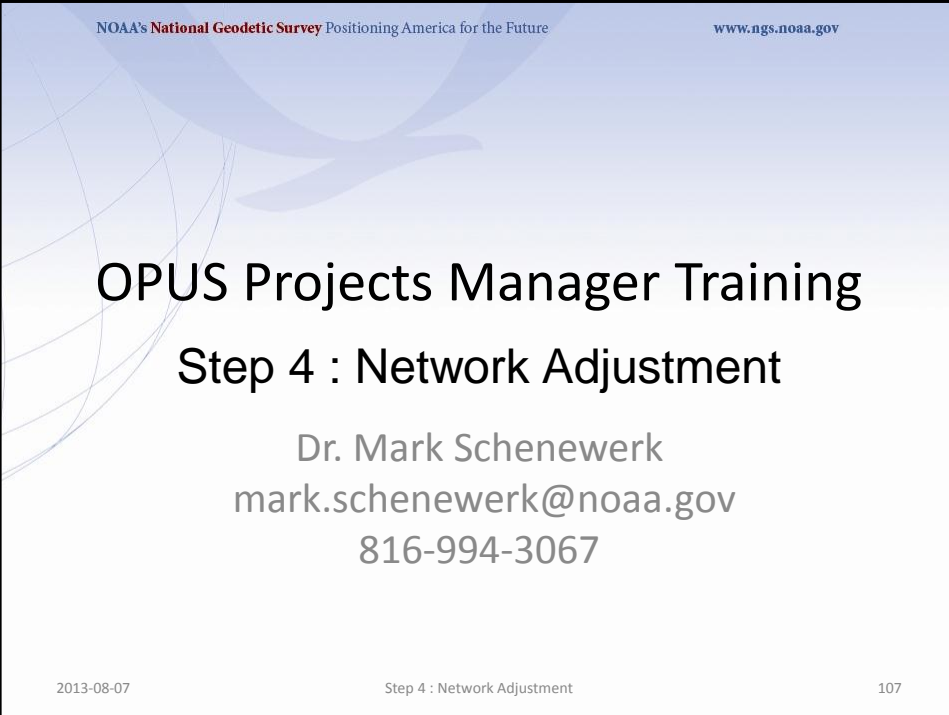

Click "OK" to continue to step (2) or "Cancel" to stop this process now.

OK Cancel

Sessions & Solutions

The last step is always to delete your project. You can keep your project on-line for as long as needed, but be courteous and "delete when complete."

2013-08-07 Step 4 : Network Adjustment 106

The slide features a light blue background with a faint graphic of a globe and a satellite orbiting it. At the top left, the text reads "NOAA's National Geodetic Survey Positioning America for the Future". At the top right, the website "www.ngs.noaa.gov" is listed. The main title "OPUS Projects Manager Training" is centered in a large, bold, black font. Below it, "Step 4 : Network Adjustment" is also centered in a bold, black font. The presenter's name "Dr. Mark Schenewerk" is centered below the title, followed by his email "mark.schenewerk@noaa.gov" and phone number "816-994-3067". At the bottom left, the date "2013-08-07" is displayed. At the bottom center, the slide title "Step 4 : Network Adjustment" is repeated. At the bottom right, the number "107" is shown.
